

# Resume Placeholder

## Instructions:

This is a placeholder PDF to demonstrate the redirect functionality of your GitHub Pages resume site.

## To use your own resume:

1. Create or export your resume as a PDF file
2. Name it "resume.pdf"
3. Replace this file in the root of your repository
4. The index.html page will automatically redirect visitors to your resume

## GitHub Pages Setup:

1. Go to your repository Settings
2. Navigate to "Pages" in the sidebar
3. Select "Deploy from a branch" as the source
4. Choose the main/master branch and root folder
5. Click Save

Your site will be available at:

<https://nishantjoshi-007.github.io/Resume/>
